

Requirements of our project:

For the user:

functional

- Logging (email and password);
- Ability to be remembered in the system by button “remember me”;
- Changing the password (if it is forgotten or cheated);
- Passing the test (directly or later);
- Choosing the topic (you can't choose more than one topic, until previous is in the process);
- In case of finishing the first task, user gets the opportunity to go for the second one;
- After making the task, users have to estimate their success by the proposed rating scale.

non-functional

- Language (English);
- Design (aimed for teens at the age go 12-16).

For the admin:

functional

- Logging (email and password);
- Adding and deleting the topics and tasks.

non-functional

- Language (English);
- Design (simplified and minimalistic)
